

Study Guide for the Population Dynamics

Some Human Population Concepts to understand:

1. Population growth model are exponential of sigmoidal
2. Population dynamics depends upon births, deaths, immigration and emigration
3. What is the projected Human carrying capacity of the planet Earth?
4. Is Replacement Level Fertility changing and how so?
5. Can a Population Pyramid prediction future population sizes of countries?
6. Are there strategies to control Human Population growth
7. Can birth control and education may effect Human population dynamics?
8. The educational level of the US population varies and may influence population dynamics.
